## Gardening advice

Hi! I wonder if you can help me. I have planted some sunflower seeds at the side of my house where it is shady. They aren't growing so well. What do you think is wrong?

Hello! I ordered some plants for my garden. The plot of soil I have isn't very big so I have had to plant them very close together. They grew well to start off with but now some are starting to die off. What do you think has happened?

I have heard that plants like sun so I put my plant in a very sunny, hot spot in my garden. The leaves are starting to wilt and the plant looks very dry. Can you help me?
